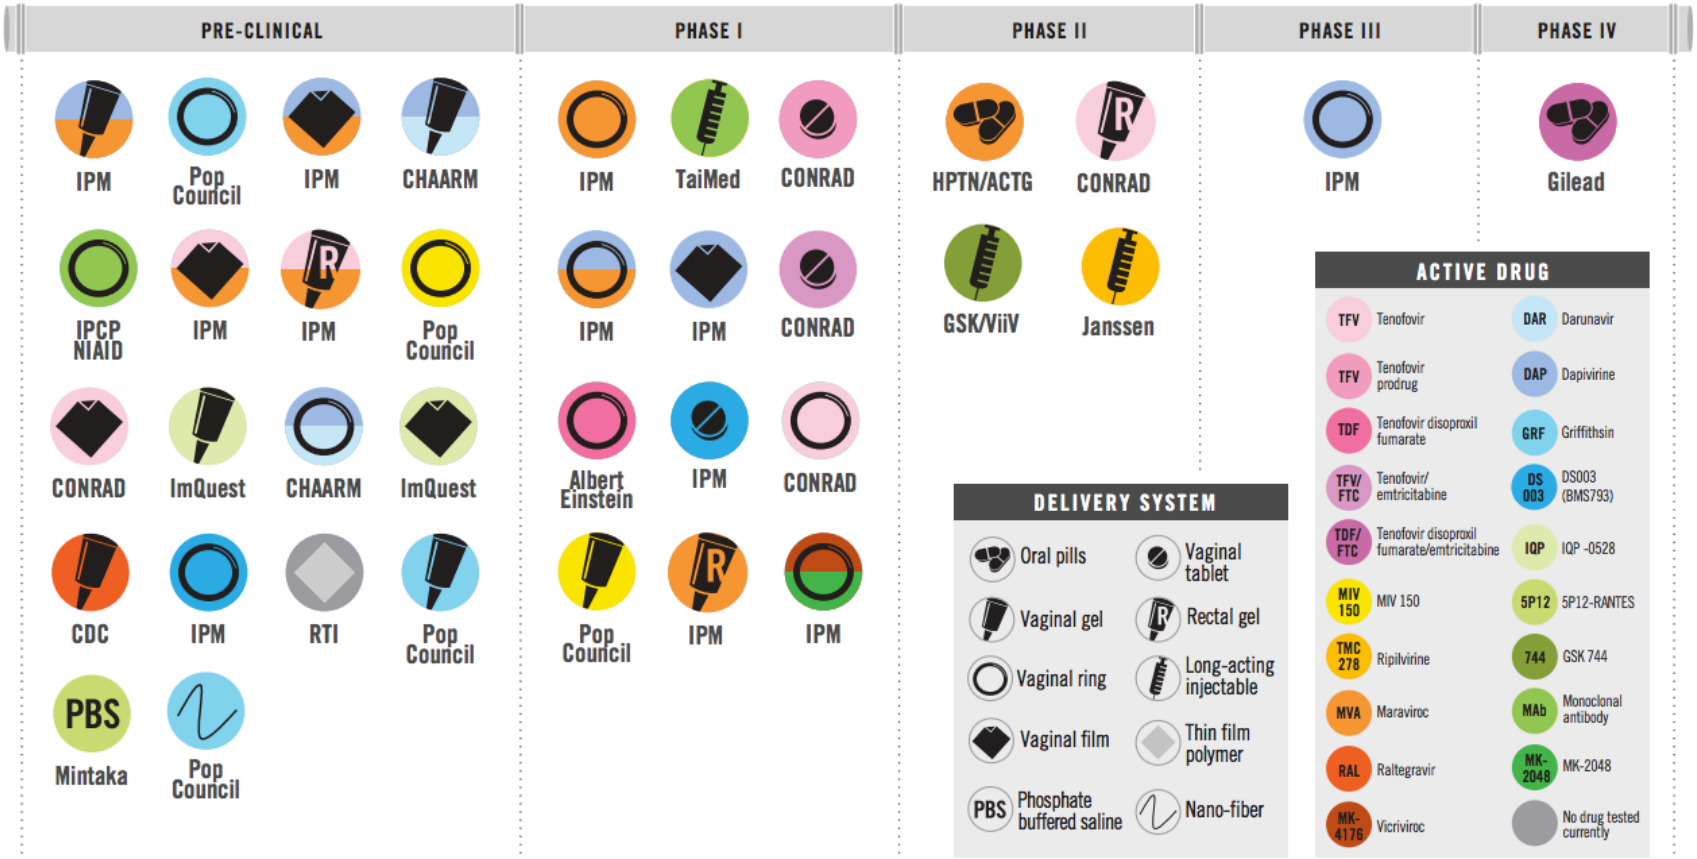
ARV-Based Prevention Pipeline

The pipeline of ARV-based prevention products includes oral pills, vaginal rings, vaginal and rectal gels, vaginal films, long-acting injectable ARVs. Not pictured are a range of multipurpose technologies in development that aim to reduce women's risk of HIV and STIs, and provide effective contraception.


For up-to-date information on the ARV-based prevention pipeline, visit the HIV Prevention Research Database at www.avac.org/pxrd.
