Targets that Require Work: PrEP and Combination Prevention

Targets are urgently needed for daily oral PrEP and combination prevention. Here are proposed goals, along with what's in place and what is missing today.

EVIDENCE

PROPOSED TARGET

CURRENT RESOURCES

POTENTIAL IMPACT

Multiple trials show that daily oral PrEP works if taken as prescribed. PrEP funded in five national strategies by end of 2015; populationspecific coverage targets by 2016.

Insufficient at present; needs to be quantified and met by 2016.

PrEPattributable incidence reduction by 2018.

Forthcoming from trials and from analyses detailed in "PEPFAR 3.0". High-impact prevention demonstrates impact in seven countries by 2016.

Skewed towards ART; need to be expanded and balanced. Effective
