

HIV PREVENTION PIPELINE: PRODUCTS TO WATCH

PRECLINICAL	PHASE I	PHASE II	PHASE III	IMPLEMENTATION
Hundreds of... <div><div> ARV-Based</div><div> MPTs</div><div> Vaccine candidates</div><div> bNABs candidates</div></div>	<div><div> 3-Monthly DPV</div><div> On-Demand TAF + EVG</div><div> Vaccine candidates</div><div> Combo bNAB candidates</div></div>	<div><div> Event-Driven FTC/TAF</div><div> On-Demand TFV</div><div> 3-Monthly DPV + LNG</div><div> Combo bNAB candidates</div></div>	<div><div> Monthly MK-8527</div></div>	<div><div> Daily TDF/FTC</div><div> Daily FTC/TAF</div><div> 2-Monthly CAB</div><div> 6-Monthly LEN</div><div> Monthly DPV</div></div>
<div><p>The US Govt's shut down of USAID ended six critical HIV research projects. With MATRIX, the field lost an important effort to develop diverse, on-demand, and multi-purpose products, especially for young women. The ADVANCE and BRILLIANT projects were researching a range of vaccine candidates while also building African-led research agendas.</p><div><div> Long-acting implants</div><div> Multi-purpose vaginal ring</div><div> Vaginal & mucosal inserts</div><div> Vaginal film</div><div> Vaccines</div></div></div>		<div><div>BIO-EQUIVALENCE</div><div><div> 4-Monthly CAB</div><div> Daily DPP</div><div> 12-Monthly LEN</div></div></div>		
<div><div>KEY:  ARV-based  MPTs  Vaccines  bNABs</div><div><div>bNAB: broadly-neutralizing antibodies, CAB: Cabotegravir, DPP: dual prevention pill, DPV: Dapivirine, EVG: Elvitegravir, F/TAF: emtricitabine/tenofovir alafenamide, LEN: Lenacapavir, LNG: Levonorgestrel, TAF: tenofovir alafenamide, TDF/FTC: tenofovir disoproxil fumarate-emtricitabine</div></div></div>
