

# What Does it Take to Conduct HIV Cure Research?

*Progress towards an HIV cure depends on strengthening four critical systems*

## Lab Equipment

- Specialized lab equipment, often with supply constraints
- Standardized systems for diagnostic testing

## Sustainable Funding

- Grants supporting multi-partner research collaborations
- Long-term funding for clinical cohorts

## Policy & Programs

- Accessible HIV prevention & treatment programs
- Rapid viral load monitoring capacity
- Advances in diagnostic technologies

## Training

- Platforms for collaborative research and advocacy
- Investment in early-career investigators
- Communication and knowledge-sharing
