Ano ang **EXPRESSIVE-11**?

Ang EXPRESSIVE-11 ay isang clinical study na sumusubok ng isang pill na iniinom isang beses kada buwan para sa pag-iwas sa HIV. Bukas ang study na ito sa mga lalaking nakikipagtalik sa kapwa lalaki, transgender na babae o lalaki, at non-binary na indibidwal.

Sa buong pag-aaral, iinom ng pill araw-araw ang mga kalahok, pwedeng ang bagong monthly PrEP sa daily form o ang kasalukuyang daily PrEP. Kasama rin dito ang regular na health check-ups para masigurong maayos ang kalusugan ng bawat participant.

A man with dark hair and a mustache, wearing a grey button-down shirt and dark trousers, is sitting in a grey armchair. He is smiling and looking down at a clipboard he is holding in his left hand, with a pen in his right hand. He has a white ID badge hanging from his neck. The background is a solid green wall, and the floor is also green. A white rectangular block is positioned behind the chair.

Is it Safe?

Yes. The pill has been tested extensively in previous clinical trials. During the study, we will check your health regularly with HIV tests, STI screenings, and routine check-ups.

You will have support every step of the way.
